

JAN K. FARIS GARCÍA

Software Engineer · Ships AI Products End-to-End

San Juan, PR (US Citizen, EST) | (939) 343-2647 | jankarlo.faris@outlook.com | linkedin.com/in/jan-faris-garcia | janfaris.com | github.com/janfaris

SUMMARY

Full-stack software engineer (ex-Microsoft) who ships AI-native products end-to-end — design, build, deploy, operate. 8 products shipped in the last 18 months, including an autonomous LLM code-review agent adopted across 7+ Microsoft repositories, an App Store app, and two open-source npm packages. Built and led an AI enablement program for 20–30 engineers, PMs, and leaders. Strong fundamentals in TypeScript, React, Python, Postgres, and cloud-native systems on Azure and AWS.

PROFESSIONAL EXPERIENCE

Microsoft — Software Engineer II, Trust Platform (Commerce Core)

Jul 2025 – Jul 2026

Remote — fraud & abuse prevention systems for Microsoft's commerce ecosystem

- **Built PRPilot, an autonomous Claude-powered PR-review agent** using Copilot CLI, Microsoft Scout, custom skills, and MCP servers (Azure DevOps, WorkIQ): continuously monitored 7+ repositories, auto-reviewed and graded ~5 vendor/team PRs daily, and escalated only the ones needing human review.
- **Maintained transaction-risk APIs and apps** that scored the riskiness of transactions across multiple Microsoft products and countries, keeping them compliant with Microsoft's Secure Future Initiative (SFI).
- **Shipped production full-stack features from prototype to launch** across TypeScript, React, Python, and Azure (AKS), and led end-to-end delivery with a vendor team across multiple workstreams.
- **Created and led an AI enablement program** — 6 hands-on sessions (Copilot CLI, MCP, agentic workflows) for 20–30 engineers, PMs, and leaders; self-initiated, then a Partner-level leader requested org-wide demos and rollout.
- **Drove security remediation and observability** (OpenTelemetry/Geneva telemetry) on Azure Kubernetes Service.

Xtillion — Associate Engineer

Jan 2024 – Jul 2025

- **Led a SQL Server → Snowflake migration** for a major healthcare client, building automated CI/CD with GitHub Actions and dbt; improved scalability and performance.
- **Replaced legacy SSRS reporting** with a modern Retool + Snowflake stack, and built HIPAA-compliant encrypted report delivery on AWS SES.
- **Cut cloud costs** by refactoring a C# application's database endpoints, eliminating an entire SQL Server instance.

Pratt & Whitney — Software Engineer (Co-Op)

Aug 2021 – Aug 2023

- **Cut build time 90%** by automating and securing CI/CD on the F-135 (Joint Strike Fighter) military DevSecOps transformation.
- **Migrated a legacy military database** to a secure modern stack (Perl, Python, SQL) and built a C code-generation wrapper and a GUI for F-135 blade-assembly validation.

Earlier: Support Engineer at BrainHi (SaaS, 2023); Founder of UPRConnect, an AI-powered student platform at UPRM.

SELECTED PROJECTS (SOLO, END-TO-END)

- **Lupa** — client-acquisition engine: audits local businesses from Google Maps with PageSpeed, generates personalized Spanish demo sites per lead with Gemini, and delivers pitches via WhatsApp with view tracking. Next.js, React, Postgres.
- **Vantage** — AI real-estate platform for Puerto Rico: voice-first natural-language property search, agent tooling, and Stripe subscriptions. Next.js, React, LLM search pipeline.
- **Open source** — two MIT-licensed npm packages for AI product engineering; 9 public repos, 1,100+ GitHub contributions in the last year (github.com/janfaris).

SKILLS

Languages: TypeScript/JavaScript, Python, SQL, C#, C

AI Engineering: LLM product development (Claude, Gemini, Copilot), AI agents, Model Context Protocol (MCP), prompt engineering, AI evals

Full-Stack: React, Next.js, Node.js, Tailwind CSS, REST APIs, Stripe

Cloud & Data: Azure (AKS), AWS (Lambda, S3, SES), PostgreSQL, Snowflake, SQL Server, dbt, GitHub Actions CI/CD, OpenTelemetry

EDUCATION & CERTIFICATIONS

University of Puerto Rico, Mayagüez — B.S. Software Engineering

Dec 2023

GitHub Copilot Certified (GH-300) — Microsoft, Jun 2026 | **Bilingual:** English & Spanish (native)
